February 03, 2023: East Palestine Train Derailment

A preliminary report released by the NTSB Thursday stopped short of declaring a conclusive cause of the derailment. But the report, along with additional details shared by officials, together offered the most detailed explanation yet of what may have sent the train off the tracks.

MAIN CHARACTER OF THE DAY

A doctor near East Palestine, Ohio, details the main thing he's watching for now

32 = Lasting; North = Yield; 14 = Great Grasp; 9 = Small Shepherd;
9,000 = Small Shepherds Trump Train (the Mack truck)('SS,000')

Norfolk Southern train 32N, a 149-car, 9,000-foot-long train traveling east (East = Casting) along the railroad's Fort Wayne Line across Ohio, derailed near East Palestine just before 9 p.m. on Friday, Feb. 3. (23 = Wearing the crown)

('our direction is to wearing the crown')

As the train approached East Palestine, a wheel bearing on its 23rd railcar rapidly overheated, its temperature soaring to more than 250 degrees ('hot and perfecting') Fahrenheit above the ambient outdoor temperature of 10 degrees. ('we are walking')

The overheating triggered an alarm, which caused the train's engineer to immediately apply the brakes to bring the train to the stop. An automatic emergency braking system also came into effect.

But when the three-person crew exited the train to inspect the bearing, they saw fire and smoke, an indicator of a possible derailment, the report said. Ultimately, 38 cars derailed, 11 of which carried toxic chemicals.

https://en.wikipedia.org/wiki/East_Palestine,_Ohio_train_derailment

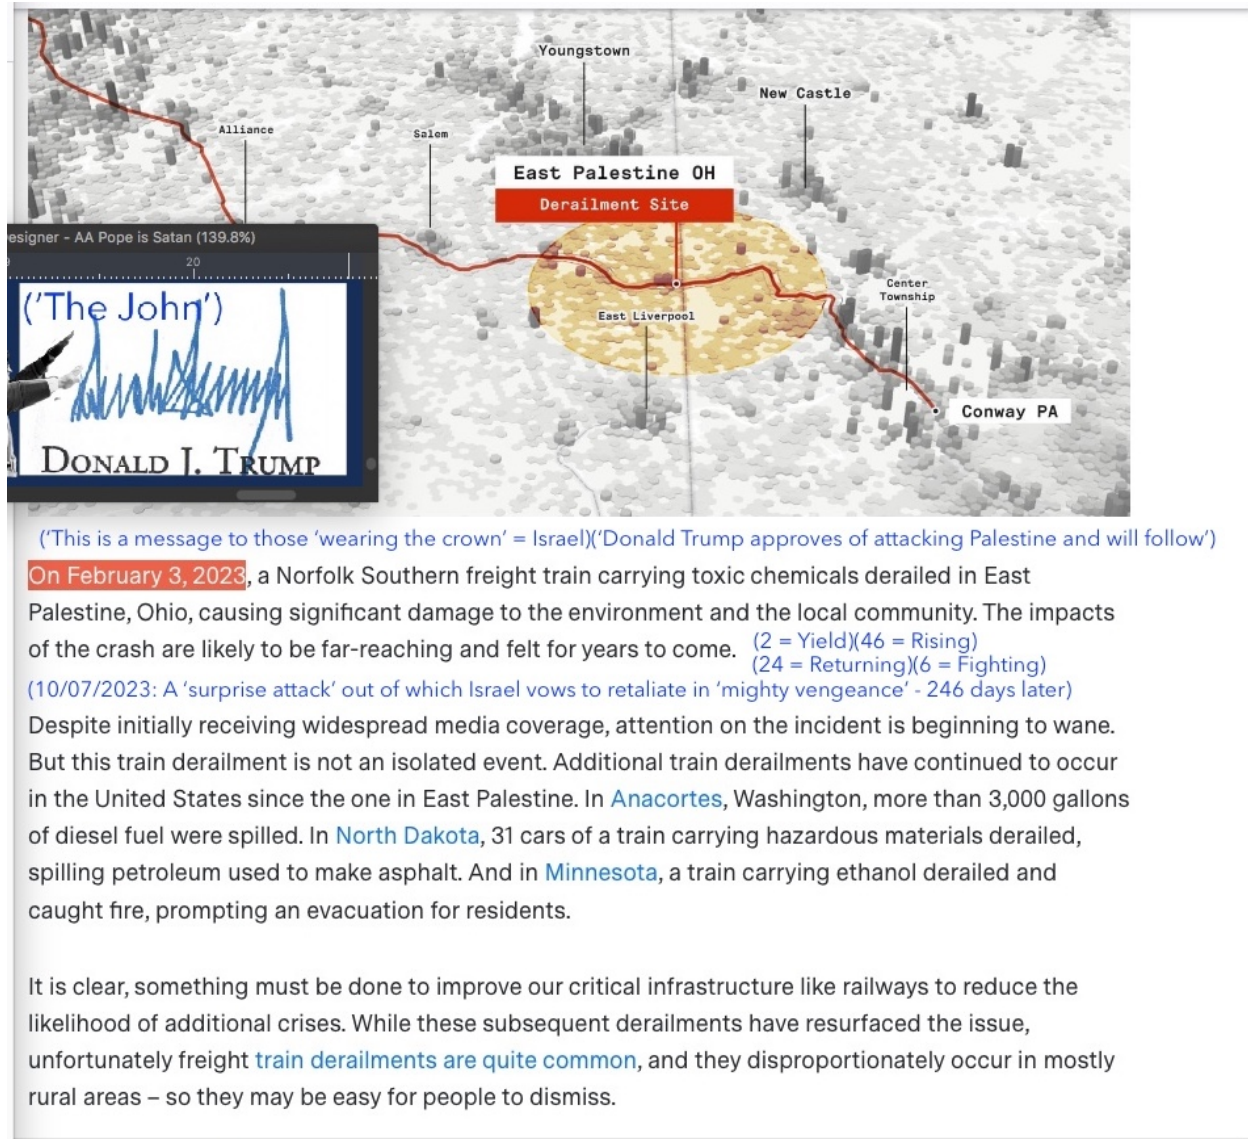

"On February 3, 2023, at 8:55 p.m. EST (UTC-5), a Norfolk Southern freight train derailed in East Palestine, Ohio, United States."

"By October 2023, Norfolk Southern removed more than 167,000 tons of contaminated soil and more than 39 million US gallons (150,000 m3) of tainted water from the derailment site."

"Derailment

Security footage from a business in **Salem, Ohio** (20 miles [32 km] **northwest of East Palestine**), and a Ring doorbell camera from New Waterford, Ohio (4 miles [6 km] northwest from East Palestine), show fire emanating from underneath a rail car as it went by on the

tracks.[25][26] After this, at around 8:55 pm EST on February 3, 2023, 38 cars derailed on the **east side of East Palestine, near the border with Pennsylvania**. [27][28][29][30] Of the 38 derailed cars, 11 were tank cars that dumped 100,000 US gallons (380,000 L) of hazardous materials, including vinyl chloride, benzene residue, and butyl acrylate. [31][32][33]"
